Contents

Volume 67 Number 1

AUTHORS		ARTICLES
J Szuber	1	Preface
B Adamowicz, M Miczek, S Arabasz and H Hasegawa	3	Rigorous analysis of photoluminescence efficiency for characterisation of electronic properties of InP(100) surfaces
G P Srivastava	11	Surface passivation by dissociative molecular adsorption
M Çakmak and G P Srivastava	21	Adsorption of GeH_2 on the bare and hydrogenated Ge(001) surfaces
O P Chikalova-Luzina and T Matsumoto	27	Isotope effect in the adsorption of H and D on the Si(111) surface from electrolytes
A C Ferraz and R Miotto	31	Zn-induced features at the GaAs(110) surface: a first-principles study
Y Fukuda, S Ichikawa, M Shimomura, N Sanada and Y Suzuki	37	Structures and electronic states of InAs (001) and (111)B surfaces passivated with sulfur studied by AES, LEED, UPS, XPS, and IPES
E V Konenkova	43	Modification of GaAs(100) and GaN(0001) surfaces by treatment in alcoholic sulfide solutions
J Szuber, E Bergignat, G Hollinger, A Polakowska and P Kościelniak	53	XPS study of the surface Fermi level of $(NH_4)_2S_x$-passivated GaAs(100) surface
J Mizsei	59	Fermi-level pinning and passivation on the oxide-covered and bare silicon surfaces and interfaces
O A Balitskii, V P Savchyn, P J Stakhira and N N Berchenko	69	Thermal and plasma nitridation of GaSe crystal
N Gabouze	75	Effect of methanol concentration on flatband potential shift of n-type Si in CH_3CN/CH_3OH mixture containing a redox couple
G Eftekhari	81	Electrical properties of sulfur-passivated III–V compound devices
M-G Kang and H-H Park	91	Surface preparation and effective contact formation for GaAs surface
D R T Zahn, S Park and T U Kampen	101	Tuning Schottky barrier heights by organic modification of metal-semiconductor contacts
K Horn, M Moreno, M Alonso, M Höricke, R Hey, J L Sacedón and K H Ploog	115	Photoelectron emission from heterojunctions with intralayers: band-offset changes vs. band-bending effects
B Gruzza, B Akkal, L Bideux, Z Benamara, and C Robert	125	Study and characterization of the structures $Au/Al_2O_3/Si$ and $Au/Al^0/Al_2O_3/Si$

PII: S0042-207X(02)00519-5

E Pinčik, H Glesková, J Müllerová, V Nádaždy, S Mráz, L Ortega, M Jergel, C Falcony, R Brunner, K Gmucová, M Zeman, R A C M M van Swaaij, M Kučera, R Juráni and M Zahoran	131	Properties of semiconductor surfaces covered with very thin insulating overlayers prepared by impacts of low-energy particles
M Kepińska, R Murri and M Nowak	143	Surface and bulk values of real part of refractive index of GaSe
M Kopáni, M Mikula, M Jergel, C Falcony, L Ortega and E Pinčík	149	About an influence of Ar ion beam of very low energy on a-Si:H properties
S-W Park, S-B Jung, M-G Kang, H-S Jung, H-H Park and H Kim	155	Investigation on the interface formation of ambient-pressure-dried SiO_2 aerogel film deposited on GaAs
J-K Yang, M-G Kang and H-H Park	161	Characteristics of interfacial bonding distribution of Gd_2O_3–GaAs structure

Volume 67 Number 2

A M Peters and M Nastasi	169	Effect of carrier gas on the deposition of titanium carbo-nitride coatings by a novel organo-metallic plasma immersion ion processing technique
V Matolín and V. Johánek	177	Static SIMS study of TiZrV NEG activation
H-S Shin, J-W Hong, T Jang, E-P Yoon, I Kim, G-Y Yeum and J-W Park	185	Effect of microstructures on the coercivity of $Fe_{1-x}B_x$ $(0 \leqslant x \leqslant 0.2)$ films prepared by dc magnetron sputtering
W Słówko and H Prasol	191	Micro-sphere plate as an electron detector at low vacuum
M S Bhatia and V K Mago	199	Interference due to degassing and metal oxide in an electron bombardment furnace used for RIS and RIMS studies
F O Adurodija, H Izumi, T Ishihara, H Yoshioka, M Motoyama and K Murai	209	Effect of laser irradiation on the properties of indium tin oxide films deposited at room temperature by pulsed laser deposition
J Greenwood	217	The correct and incorrect generation of a cosine distribution of scattered particles for Monte-Carlo modelling of vacuum systems
A L Stepanov, M Gartz, G Bour, A Reinholdt and U Kreibig	223	Novel laser universal cluster ablation source — LUCAS
R Hrach, J Šimek and M Kostern	229	Study of thin film growth by means of computer simulation and image analysis
B Erjavec, J Šetina and L Irmančnik-Belič	235	Modelling of the alkali vapour-pressure dynamics during the epitaxial growth of semi-transparent photo-emissive layers
A D Pogrebnjak, R I Shantyr and O P Kul``ment``eva	243	Modification and mixing multi-layer systems by means of a high-power ion beam
A Melnikov, M Hillmann, I Kamphausen, W Oswald, P Stauche, R Wernhardt and A D Wieck	249	Dy–Ni alloy metal ion source for focused ion beam implantation
M I Guseva, V M Gureev, L S Danelyan, V S Kulikauskas, S N Korshunov, Yu V Martynenko, P G Moskovkin, I D Skorlupkin and V V Zatekin	253	Study of co-deposited carbon layers and of mixed (W+C) layers on tungsten and graphite in a plasma accelerator
I N Martev	261	XRD and AES characterization of TiO_xN_y thin films grown by ion assisted deposition

S Lee	**267**	Evaluation and evaporation to exact resonance frequency (32.768 kHz) of semi-finished and unsealed surface mount device (SMD) quartz tuning fork resonators
P Gnanadurai, N Soundararajan and C E Sooriamoorthy	**275**	Investigation on the influence of thickness and temperature on the Seebeck coefficient of silver telluride thin films
H Otop	**285**	Growth of silver films on Cu(111) at low temperatures
G V Rao, G H Chandra, P S Reddy, O M Hussain, K T R Reddy and S Uthanna	**293**	Optical absorption studies on polycrystalline $Cu_{0.5}Ag_{0.5}InSe_2$ thin films

Volume 67 Numbers 3–4

J L de Segovia, J M Matínez-Duart and F L Tabarés	**299**	Editorial

Vacuum Science and Technology

S-I Nishizawa and M Hirata	**301**	DSMC analysis of thermal transpiration of capacitance diaphragm gauge
F Staněk, J Tesař, L Peksa, T Gronych and P Řepa	**307**	Extending the range of pressure generated dynamically up to 100 Pa in a calibration chamber pumped by a turbomolecular pump
J Tesar and D Prazak	**311**	The limitations for using the vacuum standards based on piston-cylinder technique
T Gronych, P Řepa and L Peksa	**317**	Becker's vacuum gauge operated in the decremental mode
J Gómez-Goñi, P J Lobo, J A Sánchez, N Cereceda and M C Matilla	**321**	Preliminary Monte Carlo calculation of the conductance of the aperture of a pressure calibration system in the UHV range
M Niewiński and P Szwemin	**327**	Moly flow..er—the computer program for calculation of vacuum system conductance
L Peksa, T Gronych, P Řepa and J Tesař	**333**	Measurement of the pressure differences in a large chamber where the pressure is generated dynamically
M P Lozano	**339**	Ion-induced desorption yield measurements from copper and aluminium
Y Dabin	**347**	Large accelerator vacuum system engineering
P Szwemin and M Niewiński	**359**	Comparison of transmission probabilities calculated by Monte Carlo simulation and analytical methods
J F J van den Brand, M Doets, M Kraan, S Klous and A P Kaan	**363**	The vacuum system of the LHCb vertex detector
N Rouvière and F Dubois	**373**	Vacuum system design for the I.P.H.I. project (high-intensity proton injector)
M Liniers, A García, C Fuentes, J Guasp, R Carrasco, J Alonso and M Medrano	**379**	Vacuum system of the neutral beam injectors at the stellarator TJ-II

Surfaces and Related Phenomena

M-G Barthés-Labrousse	**385**	Acid–base characterisation of flat oxide-covered metal surfaces
D Tafalla and F L Tabarés	**393**	First boronization of the TJ-II stellarator
V Philipps, P Wienhold, A Kirschner and M Rubel	**399**	Erosion and redeposition of wall material in controlled fusion devices

E Nowicka and R Dus 409 Deuterium segregation on vanadium deuteride surfaces

A Kaňka, O Kylián and V Hrachová 415 The discharge tube material influence on N_2–O_2 DC glow discharge

V Baglin, I R Collins, O Gröbner, C Grünhagel and B Jenninger 421 Molecular desorption by synchrotron radiation and sticking coefficient at cryogenic temperatures for H_2, CH_4, CO and CO_2

N Moslemzadeh, S D Barrett, V R Dhanak and G Miller 429 Valence band ultraviolet photoemission spectroscopy of Dy/W(100)

Nanotechnology

M Leisch 435 Three-dimensional nanoscale analysis in physical metallurgy

S Veprek and M Jilek 443 Super- and ultrahard nanacomposite coatings: generic concept for their preparation, properties and industrial applications

U V Desnica, I D Desnica-Frankovic, O Gamulin, C W White, E Sonder and R A Zuhr 451 UV-visible reflectivity study of the synthesis and growth of nanocrystals obtained by ion implantation

F C Barbieri, C Otani, C M Lepienski, W I Urruchi, H S Maciel and G Petraconi 457 Nanoindentation study of Ti6Al4V alloy nitrided by low intensity plasma jet process

T de los Arcos, P Oelhafen, U Aebi, A Hefti, M Düggelin, D Mathys and R Guggenheim 463 Preparation and characterization of TiN–Ag nanocomposite films

M A Baker, C Rebholz, A Leyland and A Matthews 471 Electron spectroscopic studies of nanocomposite PVD TiAlBN coatings

V Teixeira, A Monteiro, J Duarte and A Portinha 477 Deposition of composite and nanolaminate ceramic coatings by sputtering

R A Nevshupa and K Nakayama 485 Effect of nanometer thin metal film on triboemission of negatively charged particles from dielectric solids

A Barranco, F Yubero, J P Espinos, J P Holgado, A Caballero, A R Gonzalez-Elipe and J A Mejias 491 Structure and chemistry of SiO_x ($x<2$) systems

Silicon and Silicon Compounds

J J Serrano, B Guzmán, J M Blanco, O Ameziane and M Aguilar 501 Angular dependence of the steady-state oxygen surface content in oxygen sputtered silicon at several impact energies

A del Prado, E San Andrés, F L Martínez, I Mártil, G González-Díaz, W Bohne, J Röhrich, B Selle and M Fernández 507 Composition and optical properties of silicon oxynitride films deposited by electron cyclotron resonance

M Vila, J A Martín-Gago, A Muñoz-Martín, C Prieto, P Miranzo, M I Osendi, J García-López and M A Respaldiza 513 Compositional characterization of silicon nitride thin films prepared by RF-sputtering

D Gracin, M Jaksic, I Bogdanovic-Radovic, Z Medunic, T Car and B Pracek 519 Characterization of amorphous silicon carbon alloys by IBA technique and optical spectroscopy

E San Andrés, A del Prado, I Mártil, G González, F L Martínez, D Bravo, F J López and M Fernández 525 Physical properties of plasma deposited SiO_x thin films

E San Andrés, A del Prado, I Mártil, G González Díaz, F L Martinez, D Bravo and F J López 531 Rapid thermal annealing effects on plasma deposited SiO_x:H films

Hard Coatings

G Messina, S Santangelo, G Fanchini and A Tagliaferro	**537**	Evidence for the existence of scaling laws correlating the deposition parameters and the Raman spectra features in thin a-C:N:H films deposited by reactive r.f. sputtering
J A García, R Rodríguez, R Sánchez, R Martínez, M Varela, D Cáceres, A Muñoz, I Vergara and C Ballesteros	**543**	Tribological study of vanadium-based alloys ion implanted at low energy and high temperature
C Fernández-Ramos, J C Sánchez-López, M Belin, C Donnet, F Pascaretti and A Fernández	**551**	Tribological and mechanical properties of CN_x- and $SiCN_x$-TiN/Ti multilayered systems grown onto steel
R J Rodríguez, J A García, A Medrano, M Rico, R Sánchez, R Martínez, C Labrugère, M Lahaye and A Guette	**559**	Tribological behaviour of hard coatings deposited by arc-evaporation PVD

Thin Film Characterization and Properties

J Huran, I Hotový, A P Kobzev and N I Balalykin	**567**	Influence of nitrogen concentration on conductivity of N-doped a-SiC:H films deposited by PECVD
A Tarre, A Rosental, A Aidla, J Aarik, J Sundqvist and A Hårsta	**571**	New routes to SnO_2 heteroepitaxy
D Cáceres, I Colera, I Vergara, R González and E Román	**577**	Characterization of MgO thin films grown by rf-sputtering
A Muñoz-Martín, M Vila, C Prieto, C Ocal and J L Martínez	**583**	Microstructural characterization of iron thin films prepared by sputtering at very low temperatures
H-N Cui, V Teixeira and A Monteiro	**589**	Microstructure study of indium tin oxide thin films by optical methods
H W Zan, D Z Peng, P S Shih, T C Chang, P T Liu and C Y Chang	**595**	A W-spacer GOLD TFT with high performance and high reliability

Thin Films of Electronic Devices

V-M Tiainen, R Lappalainen and A Anttila	**599**	Protection of industrial sensors with ta-C
T J Tate	**605**	VLSI spin-offs and technological innovation
J Herrero and C Guillén	**611**	Transparent films on polymers for photovoltaic applications
G G Bondarenko, V V Andreev, A A Stolyarov and A L Tkachenko	**617**	Modification of metal-oxide-semiconductor devices by electron injection in high fields
C Nunes, V Teixeira, M Collares-Pereira, A Monteiro, E Roman and J Martin-Gago	**623**	Deposition of PVD solar absorber coatings for high-efficiency thermal collectors

Thin Films Deposition and Deposition Techniques

A Vesel and M Mozetic	**629**	Discharge characteristics of a magnetron cell in ultrahigh vacuum
J C Jiménez-Sáez, J Domínguez-Vázquez, A M C Pérez-Martín and J J Jiménez-Rodríguez	**635**	Simulation of ion beam induced atomic mixing of interfaces
D Z Peng, H W Zan, P S Shih, T C Chang, C W Lin and C Y Chang	**641**	Comparison of poly-Si films deposited by UHVCVD and LPCVD and its application for thin film transistors
P González, J Serra, S Liste, S Chiussi, B León and M Pérez-Amor	**647**	Ageing of pulsed-laser-deposited bioactive glass films

J L Arias, M B Mayor, J Pou, B León and M Pérez-Amor	**653**	Pulse repetition rate dependence of hydroxylapatite deposition by laser ablation
C Guillén and J Herrero	**659**	Semiconductor $CuInSe_2$ formation by close-spaced selenization processes in vacuum
Z Strýhal, J Pavlík, S Novák, A Macková, V Peřina and K Veltruská	**665**	Investigations of SnO_2 thin films prepared by plasma oxidation
A Anders	**673**	Energetic deposition using filtered cathodic arc plasmas
H Thanner, P W Krempl, W Wallnöfer and P M Worsch	**687**	$GaPO_4$ high temperature crystal microbalance with zero temperature coefficient
E M González, J E Villegas, D Jaque, E Navarro and J L Vicent	**693**	Fabrication of 2D, 1D and 0D ordered metallic nanostructures
